

Block TAN

The TAN block returns the tangent of its input.

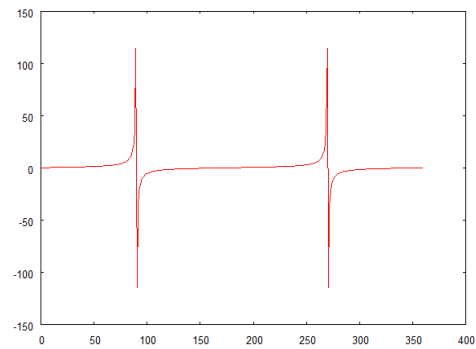

Name	TAN
Function	fb0007
Inputs	1
Outputs	1
Parameters	0 ... [1]
Strings	0
Group	S

Inputs	1	Any angle α
Outputs	1	Tangent of α
Parameters	1	Degrees / radians switch p . If p is set to 0 (default) α is interpreted in degrees. If p is set to 1 α is interpreted in radians.
Strings		None

tan.vseit

A **DO** block varies α from 0.5 (in order to avoid the discontinuities of the tangent function) to 360 degrees in steps of one degree. The **TAN** block calculates $\tan(\alpha)$ and the **PLOT** block displays the graph on screen.
