Block IFELSENAN

IFELSENAN expects a signal x_1, and one logical signal x_2. If x_2 is true, x_1 is returned. If x_2 is false, *NaN* is returned.

This behaviour can be useful in order to indicate missing data, e.g. for plots. IF block is similar, but simply doesn't return anything if x_2 is false.

if...
NaN

Name	IFELSENAN
Function	fb0085
Inputs	2
Outputs	1
Parameters	0
Strings	0
Group	S

Inputs

1 Any signal x_1
2 Any logical signal x_2

Outputs

1 x_1 or *NaN*

Parameters

None

Strings

None
